Health Care Financing Program Statistics

The Health Care Financing Administration was established to combine health financing and quality assurance programs into a single agency. HCFA is responsible for the Medicare program, Federal participation in the Medicaid program, and a variety of health care quality assurance programs. The mission of the Health Care Financing Administration is to promote the timely and economic delivery of appropriate, quality health care to its beneficiaries — approximately 49 million of the nation's aged, disabled, and poor.

HCFA's Office of Research and Demonstrations (ORD) conducts studies and projects that demonstrate and evaluate optional reimbursement, coverage, eligibility, and management alternatives to the present Federal programs. ORD also assesses the impact of HCFA programs on health care costs, program expenditures, beneficiary access to services, health care providers, and the health care industry.

Medicare *Program Statistics* present detailed reports on Medicare enrollment, providers, and the use of reimbursement for covered services. Medicare enrollment data report the number of persons insured under Part A and Part B of the Medicare program by age, race, sex, and place of residence. Provider statistics consist of information on the number, distribution, and characteristics of hospitals, skilled nursing facilities, home health agencies, and independent laboratories certified to furnish and receive payment for covered health services to Medicare beneficiaries.

Introduction

This report presents data on the characteristics of the aged and disabled persons enrolled in the Medicare program during 1979, and is a continuation of the series that began with the data for 1966. Changes in enrollment of the aged since the start of the program on July 1, 1966, are discussed by selected characteristics. The general tables (A through I) which cover 1978 and 1979, present separate data for aged and disabled beneficiaries by type of coverage, age, race, sex, and State of residence. Medicare coverage was extended to disabled persons under 65 years of age by the Social Security Amendments of 1972 (Public Law 92-603). Included with all disability beneficiaries are persons eligible solely because of end-stage renal disease (ESRD). The counts of beneficiaries are as of July 1 of the year shown.

Highlights

The findings in this report are presented separately for aged and disabled beneficiaries.

Aged

Enrollment Growth, 1966–1979

The aged population enrolled in Medicare has been growing at twice the rate of the U.S. population as a whole.

- The number of persons 65 years and older covered under hospital insurance and/or supplementary medical insurance (HI and/or SMI) increased from 19.1 million in 1966 to 24.9 million in 1979—a total increase of 31 percent and an average annual increase of 2.1 percent.
  - ●● Between 1965 and 1979, the population of the U.S. increased from 193.5 to 220.1 million, an average annual increase of 0.9 percent.
- Aged persons enrolled in the hospital insurance (HI) program increased from 19.1 million in 1966 to 24.5 million in 1979—a total increase of 29 percent and an average annual increase of 2.0 percent.
- The enrollment in the supplementary medical insurance (SMI) program grew at a more rapid rate than the hospital insurance (HI) program, from 17.7 million in 1966 to 24.1 million in 1979—an average annual increase of 2.4 percent. This mainly reflected the increasing proportion of HI enrollees who are voluntarily enrolling for SMI (from 91.8 percent in 1967 to 96.5 in 1979).

CHARACTERISTICS OF AGED BENEFICIARIES ENROLLED FOR HI, 1966-1979

Entitlement

- Between 1966 and 1979 the proportion of HI beneficiaries entitled by virtue of eligibility for social security benefits increased from 84 to 94 percent. During this period 3 percent were entitled under railroad retirement benefits. The largest change was in beneficiaries entitled under special transitional provisions (see "Eligibility," Appendix B). By 1979, only about 2 percent of the HI beneficiaries (compared to 14 percent in 1966) were entitled under these provisions.

This report is one of a series prepared in the Office of Research, Judith Lave, Director. It was written in the Division of Beneficiary Studies, Allen Dobson, Director. Data for this report were supplied from the Medicare Statistical System which is designed and maintained by the Office of Statistics and Data Management, Bureau of Data Management and Strategy.

Age, Sex, Race, and Residence

The aged Medicare population has become increasingly older, more heavily weighted toward women and non-whites, and more concentrated in the South.

- In 1979, Medicare beneficiaries continued to show greater longevity. Persons 75 years or older constituted 40.6 percent of the total enrollment (up from 37.2 percent in 1966). Similarly, beneficiaries 85 years and over constituted 9.4 percent of the enrollment in 1979, (up from 6.2 percent in 1966).
- Because of their greater longevity, women constitute a growing proportion of Medicare beneficiaries. In 1979, 59.5 percent of the beneficiaries were women—an increase from 57.4 percent in 1966. Between 1966 and 1979, the proportion of women age 75 years and over increased from 39 to 44 percent compared to an increase from 35 to 36 percent of men.
- Enrollment of non-whites among HI beneficiaries increased from 7.6 percent in 1966 to 8.6 percent in 1979. This represents an average annual increase of 2.9 percent compared to 1.9 percent for whites.
  - ●● In 1979, aged non-whites were underrepresented among HI enrollees relative to their presence in the U.S. aged population where they constituted 9.4 percent of all aged persons.
- Between 1966 and 1979, the South replaced the North Central States as the region having the largest percentage of HI beneficiaries. This was primarily because of migration to Florida and other Southern States. The proportion living in the South increased from 28.8 percent in 1966 to 32.2 percent in 1979, while the North Central States declined from 29.5 to 26.8 percent. The Northeast decreased from 26.7 to 24.2 percent, and the West increased from 15.0 to 16.6 percent.
- About 54 percent of non-whites among HI beneficiaries lived in the South in 1979.
  - ●● In every census division outside the South, non-whites constituted less than 10 percent of the HI enrollment.
- About 69 percent of the aged HI enrollees lived in metropolitan counties.

New Enrollments and Terminations of Aged Persons in 1979

Hospital Insurance

- Over 1.8 million aged persons were newly enrolled under HI during 1979, accounting for 7 percent of the total (a percent that has remained constant since Medicare began).
- Coverage was terminated, because of death, for 1,270,000 persons—5 percent of the total HI enrollment.

CHARACTERISTICS OF AGED HI BENEFICIARIES ENROLLED FOR SMI, 1966-1979

HI and SMI beneficiaries have a similar distribution of characteristics because they are essentially the same people (96.5 percent of HI beneficiaries enrolled for SMI in 1979).

- A higher percentage of white HI beneficiaries than non-whites enroll for SMI—a difference that has existed since 1966, but which has narrowed. In 1966, the respective percentages were 93.2 and 86.1. In 1979, the percentages were 96.9 for whites and 93.0 for non-whites.

Beneficiaries Enrolled for SMI Only

- In 1979, about 399,000 persons lacking the required work credits for HI eligibility elected to enroll for SMI. This group accounted for 1.7 percent of all SMI enrollees. In 1968, about 51,000 were enrolled for SMI only and constituted about 0.3 percent of all SMI enrollees.

State Buy-Ins

In 1978, SMI premiums for 2.5 million aged SMI beneficiaries were paid by States and other governmental jurisdictions because these beneficiaries received public assistance or qualified for medical assistance programs. They represented 11 percent of the total SMI enrollment, a slight decrease from 1977, and it was the second consecutive year there was a year-to-year decrease.

Disabled

Enrollment Growth, 1973-1979

- Disabled beneficiaries enrolled in HI increased from 1.7 to 2.9 million between 1973 and 1979. During the same period, disabled SMI enrollment increased from 1.6 to 2.7 million. In both cases, the total increase was about 69 percent and the average annual increase was 9 percent.
  - The disabled are not permitted to carry only SMI coverage, except in rare special cases. Therefore, the HI enrollment constitutes the total number of disabled persons covered by Medicare.

CHARACTERISTICS OF DISABLED BENEFICIARIES ENROLLED FOR HI, 1973-1979

Type of Beneficiary

- The largest group of disabled beneficiaries is disabled workers, representing about 80 percent of the enrollment since 1973. The other types of beneficiaries are adults who became disabled during childhood (decreased from 16 percent of the enrollment in 1973 to 14 percent in 1979), widows and widowers (4 percent in both years), and persons eligible only because of ESRD (increased from 0.4 percent in 1973 to 0.8 percent in 1979).

Age, Sex, Race, and Region

Unlike the aged population, the disabled have remained relatively stable in age, are predominantly male, and are more weighted toward non-whites relative to their proportion of the total population under 65 years of age. Like the aged, more non-whites live in the South than in any other region.

- The median age of HI disability beneficiaries has remained around 55 years of age since 1973. The percentage of beneficiaries between 55 and 64 years of age has been between 51 and 53 percent of the total since 1973.
- Women, as a percentage of the disabled enrolled for HI, increased from 35.4 percent in 1973 to 36.9 percent in 1979. In 1979, women constituted 39 percent of HI beneficiaries between 55 and 64 years of age and about 34 percent of those under 55 years.
- The proportion of non-whites among disabled HI beneficiaries increased from 14.6 percent in 1973 to 16.2 percent in 1979. In 1979, non-whites constituted 14.2 percent of the U.S. population under 65 years of age.
- From 1973 to 1976, the median age of non-whites was about one year lower than for whites and was almost two years lower in 1979.
- The distribution of disabled HI beneficiaries by region has been stable since 1973. In 1979, the South had the highest proportion of beneficiaries, 38 percent, and the West had the lowest, almost 17 percent. Half of the disabled non-whites lived in the South.

CHARACTERISTICS OF DISABLED HI BENEFICIARIES ENROLLED FOR SMI, 1973-1979

Rate of Enrollment

- The percentage of disabled HI beneficiaries enrolled for SMI has generally been lower than that of the aged. In 1979, the percentage of the disabled was 91 percent compared to 97 percent of the aged. This may reflect the presence of disabled veterans in the disability population who may be receiving medical benefits from the Veterans Administration.

Type of Entitlement

- Because of greater veteran status among male disabled workers enrolled for HI, SMI enrollment among them was only 89.7 percent compared to 93.2 percent of disabled women workers enrolled for SMI. The SMI enrollment among the other categories of disabled beneficiaries was around 94 percent.

Age, Race, Sex, and Residence

- The distribution of SMI beneficiaries by age, race, sex, and residence showed only small differences from the HI distributions. The percentage of women among disabled SMI beneficiaries was 37.7 percent compared to 36.9 percent among disabled HI beneficiaries.

State Buy-Ins

- In 1978, SMI premiums for about 480,000 disabled beneficiaries were paid by States and other governmental jurisdictions. This group constituted 19 percent of the SMI enrollment.

BENEFICIARIES WITH END-STAGE RENAL DISEASE (ESRD)

Number

- On July 1, 1979 there were 23,598 persons under age 65 receiving Medicare benefits because they met the insured status requirements for coverage only because of ESRD. In addition, there were 19,532 persons who were "dually" entitled because, in addition to meeting insured status requirements because of ESRD, they had been entitled to receive disability cash benefits for at least 24 months.

- Among beneficiaries receiving Medicare benefits only because of ESRD, the median age was 45.1 years; 51 percent were men, and 69 percent were white.
- Among those who were "dually" entitled, the median age was 48.9 years; 64 percent were men, and 65 percent were white.
  - Among both categories of enrollees with ESRD, the percentage of non-whites was much higher than their proportion of the total national population of persons under 65 years of age.

The Aged

Enrollment Growth of the Aged, 1966-1979

The enrollment of the aged in the hospital insurance (HI) and supplementary medical insurance (SMI) has increased each year since the beginning of the program. Aged persons enrolled for HI and/or SMI increased from 19.1 million in 1966 to 24.9 million in 1979—an average annual increase of 2.1 percent. That was more than double the rate of increase of the U.S. population during that period. Between 1965 and 1979, the population of the U.S. increased from 193.5 to 220.1 million, an average annual rate of 0.9 percent (U.S. Bureau of the Census, 1980, Table 10). As indicated in Table 1, enrollment in the HI program grew 29 percent, from 19.1 million in 1966 to 24.5 million in 1979 because persons aging into the program exceeded the number of beneficiaries who died. SMI enrollment grew 36 percent from 17.7 million in 1966 to 24.1 million in 1979. Nearly all persons 65 years and over are entitled to HI. (For estimates of the number of aged not covered by Medicare, see U.S. Bureau of the Census, 1979 Evaluation.) Persons enrolled for SMI coverage must pay a premium or have it paid on their behalf. During the period from 1966 through 1979, the average annual rate of increase in HI enrollment was 2.0 percent. The average annual rate of increase in SMI enrollment during the period between 1966 and 1979 was 2.4 percent. Between 1967 and 1968, a 5 percent increase in SMI enrollment was caused by the first general enrollment period which took effect on July 1, 1968. Between 1972 and 1973, SMI enrollment increased almost 3 percent, reflecting the removal of the 3-year limit for enrollment during the 1973 general enrollment period and the beginning of automatic enrollment of persons entitled to HI unless specifically declined by the beneficiary.

The number of persons 65 years and over covered only by HI benefits increased in 1979 from a record low of 825,000 in 1976 to 849,000. The increase was caused by fewer persons electing SMI coverage during the general enrollment period (GEP) that ran from January through March 1979, with coverage beginning July 1, 1979.

HI Enrollment of the Aged, 1979

TYPE OF ENTITLEMENT

Table 2 indicates that, in 1979, about 94 percent of the aged persons entitled to HI benefits were receiving or were eligible for social security retirement benefits, and about 3 percent were receiving or were entitled to railroad retirement benefits. Some persons are entitled to both social security and railroad retirement cash benefits because of earnings under both programs. In Table 2, from 1975 on, these persons are reported as entitled to railroad retirement benefits. Prior to 1975 these persons are counted in both categories but only once in the total. The remaining enrolled population was not entitled to receive cash benefits under either social security or railroad retirement, and is classified as "other enrolled persons." This group is entitled to HI coverage under a transitional provision of the law. Under this provision, persons who attained age 65 before 1968 needed no work credits under social security to be entitled to HI. Beginning January 1, 1968, three calendar quarters of work credits under social security were required for each year after 1966 for entitlement to HI coverage. By 1975, entitlement to HI required the same number of quarters of coverage as required for entitlement to social security cash benefits. The number of "other enrolled persons" steadily declined from 1.5 million on July 1, 1967 (7 percent of the total) to 553 thousand by July 1, 1979 (2 percent of the total).

DEMOGRAPHIC CHARACTERISTICS

Table 3 shows the year-to-year changes since 1966 by selected demographic characteristics of aged persons enrolled for HI. The remaining tables in this section show the changes since 1966 in percentage distribution in more refined breakdowns of these demographic characteristics: residence (Table 4), and race and residence (Table 5). Hence, references will be made to both Table 3 and the detail tables.

Age, Sex, and Race

Table 3 indicates that the age distribution of persons 65 years and over in 1979 continued to show the trend toward greater longevity among the aged beneficiary population. In 1966, 37.2 percent of the HI population was age 75 and over; in 1979, 40.6 percent reached age 75 and over. Those 85 years and over showed the largest rate of increase since Medicare began, increasing from 6.2 to 9.4 percent of the HI population.

As may be derived from Table 3, between 1966 and 1979 there was an increase of 33 percent in the number of women enrolled for HI compared to a 22-percent increase of men. The increase of women has been greater each year. As a result, the proportion of men among HI beneficiaries has declined steadily since 1966. In 1979, men comprised 40.5 percent of all HI beneficiaries compared to 42.6 percent in 1966. During the same period, the proportion of women increased from 57.4 percent in 1966 to 59.5 percent in 1979.

The increased proportion of women among HI beneficiaries is attributable to their greater longevity and the declining proportion of foreign-born in the aged population, who were mostly men. The proportion of women age 75 and over increased from 39 percent in 1966 to 44 percent in 1979. The corresponding increase for men was only from 35 to 36 percent (Table 3).

TABLE 2

Number and Percent Distribution of Persons 65 and Over Enrolled for Hospital Insurance by Type of Entitlement, July 1, 1966–1979[1]

[1] Enrollment as of October 1.
[2] Consists of 50 States, the District of Columbia, and residence unknown.

Between 1966 and 1979, non-white persons showed a greater rate of increase than whites among HI beneficiaries. Table 3 shows that non-white persons increased 45 percent (an average annual rate of 2.9 percent) compared to 28 percent for whites (an average annual rate of 1.9 percent). As a result, the proportion of non-white persons among HI beneficiaries increased from 7.6 percent to 8.6 percent. In 1979, non-whites constituted 9.4 percent of the U.S. population 65 years and over (U.S. Bureau of the Census, 1980, Table 33). Thus, non-whites are underrepresented among HI enrollees. Persons of unknown race represented about 3 percent of the beneficiaries during this period—mostly railroad retirement beneficiaries. As was true for the general enrollment, between 1966 and 1979 the increase of non-white women was higher (51 percent) than that of non-white men (38 percent). The average annual rates were 3.2 and 2.5 percent, respectively.

GEOGRAPHIC DISTRIBUTION

Table 4 contains percentage distributions by census region and division. All four regions showed annual increases from 1966 to 1979 in the number of persons covered by HI benefits (Table 3). In 1979, the largest proportion of the HI population lived in the South, and this has been true since 1968. During the period 1966 to 1979, the South had the largest numerical growth (2.4 million) and the highest relative increase—44 percent; the average annual rate increase was 2.8 percent thereby increasing the proportion of HI beneficiaries living in the South from about 29 percent to 32 percent. The West, which has always had the smallest proportion of the enrolled HI population, showed the next highest enrollment gain during the 1966-1979 period (1.2 million), which increased the proportion of HI beneficiaries living there from 15 to 17 percent. Changes in enrollment by census region depend not only on the number of persons aging into the program and the number of deaths among those age 65 and over, but also on interstate migration of Medicare beneficiaries.

Between 1975 and 1979, over 2 percent of all persons 65 and over migrated between regions, chiefly from the Northeast and North Central States to the South (U.S. Bureau of Census, Series P-20, Number 353).

By census division, both the Middle Atlantic and East North Central States had the largest proportions (18 percent) of the HI beneficiaries in 1979, but both divisions have shown declining proportions over the years. The Mountain States have had the lowest proportion of the aged HI enrollees (about 4 percent) but have been showing a slightly increasing trend.

Referring to General Table B for 1979 and comparing the data to those for 1966 (Health Insurance for the Aged, 1966: Section 2) shows that enrollment increased in each of the 50 States between 1966 and 1979. The largest numerical rise was in Florida (728,000), accounting for nearly one-third of the total growth of enrollment in the South. Much of Florida's growth came from the migration of the elderly from the Northeast and North Central States.

Ranking next in numerical growth between 1966 and 1979 were: California, 596,000; Texas, 362,000; Pennsylvania, 236,000; North Carolina, 178,000 and New Jersey, 166,000. These six States represented 44 percent of the increase in HI enrollment between 1966 and 1979. The District of Columbia had a 2-percent decline in enrollment—probably representing out-migration.

Most of the increase in the HI population between 1966 and 1979 occurred in metropolitan counties. In revising standard metropolitan statistical areas, the Office of Management and Budget reclassified many non-metropolitan counties to metropolitan counties without central cities. These revisions, effective in 1973, account for most of the changes shown in Table 3.

By 1979, 69 percent of the aged persons covered by hospital insurance were living in metropolitan counties. The proportions of these beneficiaries showed large variations by geographic area. In the South only 60 percent lived in metropolitan counties, while in the Northeast 83 percent resided in metropolitan counties (General Table C). Almost

Mountain	3.3	3.5	3.6	3.7	3.7	3.7	3.8	3.9	3.9	4.0	4.1
Pacific	11.7	11.9	12.0	12.0	12.1	12.1	12.2	12.3	12.4	12.5	12.5

three-fourths of the aged HI beneficiaries living in a metropolitan county resided in the standard metropolitan statistical area having a 1975 population of 500,000 or more (General Table D). Since 1973, when the revised definitions went into effect, the fastest rate of growth has been in metropolitan areas without a central city (an average annual increase of 3.2 percent compared to an overall rate of 2.2 percent).

As shown in Table 5, in 1979, 54 percent of the non-white HI beneficiaries lived in the South. As may be derived from Table 5, in every census division outside the South, whites constituted over 90 percent of the aged enrollment. In the three divisions of the South, whites constituted only 80 to 85 percent of the HI enrollment.

PREMIUM HI COVERAGE

Effective July 1, 1973, the 1972 Social Security Amendments permitted aged persons who are ineligible for HI to enroll voluntarily by paying a monthly HI premium. Eligibility of persons age 65 and over requires only that they be citizens, or aliens residing permanently in the United States for the previous 5 years, and that they be enrolled for SMI. The requirement of SMI enrollment is intended to reduce the possible excess usage of the more costly HI services. The HI premium was set at $33 a month for a 12-month period beginning July 1, 1973. It increased to $36 beginning July 1, 1974, to $40 beginning July 1, 1975, to $45 beginning July 1, 1976, to $54 beginning July 1, 1977, to $63 beginning July 1,

Note. Percentages may not add to totals because of rounding.

[1] Includes persons of unknown race.

1978, and to $69 beginning July 1, 1979. This amount represents the estimated *per capita* cost for services furnished under the hospital insurance program.

Table 6 shows the distribution of persons enrolled for premium HI during 1979 by race and sex. During 1979, there were 23,452 persons enrolled for premium HI coverage—a 90-percent increase since 1973. Women made up 78 percent of those enrolled. By race, 82 percent of those beneficiaries were white, only 6 percent were non-white, and for 12 percent, race was not known.

SMI Enrollment of the Aged

THE RATE OF GROWTH IN SMI ENROLLMENT

Between 1966 and 1979, SMI enrollment increased about 36 percent. The average annual increase in SMI enrollment since 1966 was 2.4 percent (derived from Table 7) compared to 2.0 percent for HI. As a result, for the 1966-1979 period, SMI enrollment grew nearly 1.2 times that of HI. As shown in Table 8, the higher rate of growth of SMI enrollment was reflected in the increased proportion of the HI population also enrolled for SMI. This percentage rose from 92.5 percent in 1966 to 96.5 percent in 1979. The proportion declined in 1967 because there was no general enrollment period. The ratio increased in 1968 and again in 1969, then remained virtually unchanged (at about 95.5 percent) until 1973. The large affirmative response during the 1973 general enrollment period accounted for the increase in 1973 (from 95.4 to 95.9 percent). Also the 1972 Amendments provided for automatic enrollment of persons in SMI as they become entitled to hospital insurance beginning July 1, 1973, (see Provisions of the Law in Appendix B of this report).

AGED PERSONS ENROLLED IN HI AND SMI, 1979

The distribution of characteristics among persons enrolled under the HI and SMI programs in 1979 differed little by age, race, and sex. This is to be expected because the proportion of HI beneficiaries also participating in SMI was almost 97 percent (Table 8). However, there were some differences by race, sex, and residence among HI beneficiaries in the degree of enrollment in SMI.

Race, Sex, and Residence

Table 8 shows that the largest difference in the proportion of the aged population also enrolled in SMI was between races. In 1979, 96.9 percent of the white population enrolled for HI were also enrolled in SMI, compared with 93.0 percent of non-whites. The higher rate for whites in every age and sex group has prevailed since 1966. When Medicare began, the proportion of the HI white population also enrolled in SMI was 93.2 percent, compared with 86.1 percent of non-white persons—a difference of 7.1 percentage points. The difference hovered around 6 percent until 1973 when SMI enrollment among whites increased while enrollment for non-whites fell.

Since 1973, the growth of SMI enrollment among non-whites has exceeded that of whites, so the difference in participation rates by race narrowed to 3.9 percentage points by 1979.

The percentage of HI beneficiaries covered by SMI varied slightly by sex. In 1979, the overall participation of women (97.0 percent) was greater than that of men (95.9 percent) by about one percentage point, but among non-white persons, enrollment of women was over 2 percentage points greater than that of men.

[1] Prior to 1970, only a small number of enrollees were eligible for SMI but not for HI. The number of SMI enrollees expressed as a proportion of the number of HI enrollees, therefore, provided an adequate measure of participation in the voluntary part of the program. However, by 1970, with 130,000 persons enrolled in SMI but not eligible for HI, enrollment in both HI and SMI as a proportion of HI enrollment has been computed as a more accurate indicator of SMI coverage. The percentages from 1970–79 are so computed.

[2] As of October 1, 1966.

Table 9 shows the rate of SMI participation by census region and division. The proportions of HI beneficiaries also participating in SMI in the different regions of the U.S. have converged since 1968. The figures in 1979 ranged from 97.9 percent in the Northeast and North Central States to 97.3 in the South. In 1968, the range was 96.7 in the Northeast to 95.3 in the South. A lower rate of SMI enrollment prevailed among HI beneficiaries residing in outlying areas, such as Puerto Rico (see General Table A), and in foreign countries. Medicare benefits are not ordinarily paid for services provided in foreign countries. In the outlying areas the average SMI participation rate was 62 percent. Such factors as lower income and differing arrangements for medical care in those areas probably account for the lower rate of SMI enrollment.

SMI-ONLY BENEFICIARIES

On July 1, 1979, 399,000 persons who lacked the required work credits for HI eligibility were enrolled for SMI-only—an increase of 12,000 persons from July 1, 1978 (Table 10). Some 24,000 of them were retired Federal employees insured under the Federal Health Benefits Act of 1959. In 1979, this group constituted 1.7 percent of all SMI enrollees. In 1968, when there were only 51,000 SMI-only enrollees, they constituted 0.3 percent of the SMI enrollment.

Beneficiaries enrolled only for SMI differed considerably from those protected by both parts of Medicare. In 1979, 84 percent of those enrolled for SMI-only were under 75 years of age, compared to about 60 percent of those covered by both programs. Because women are less likely to meet the work credit requirements, they comprised 73 percent of SMI-only beneficiaries compared with 60 percent of those covered by both programs. By race, SMI-only beneficiaries had higher proportions of non-white persons, 23 percent, and persons of unknown race, 6 percent; of those having both HI and SMI coverage the proportions were 8 and 3 percent, respectively. The trend in the distribution of beneficiaries eligible only for SMI by race and sex is shown in Table 10.

[1] State of residence is not necessarily State that bought coverage.

[2] Data for these areas are combined to prevent disclosure of confidential information.

STATE BUY-IN AGREEMENTS

At the start of Medicare, 22 States elected to enroll and pay premiums for aged persons who receive cash payments under public assistance programs. Public Law 90-248 extended eligibility effective April 1, 1968, to those who qualify for medical assistance programs. By January 1, 1970, the closing date for requesting either arrangement, 46 States, the District of Columbia, Guam, and the Virgin Islands had signed buy-in agreements for coverage of persons receiving cash assistance. Twenty-seven States and two areas have extended such coverage to aged medically indigent persons. The medically indigent have incomes and assets which are greater than the maximum allowed for qualifying for public assistance but which are inadequate for paying their medical expenses. There were 2.5 million aged buy-ins enrolled as of July 1, 1978, or almost 11 percent of all SMI beneficiaries. Data for July 1, 1978, (Table 11), show that the States having the highest proportions of aged SMI beneficiaries enrolled under the buy-in arrangement were Mississippi (30 percent), Alabama (27 percent), Arkansas (23 percent), Georgia (23 percent) and South Carolina (22 percent). With the exception of Georgia, these States had the lowest *per capita* personal income in 1978. (Survey of Current Business, August 1978).

Since 1970, aged State buy-in beneficiaries have represented about 11 percent of the total Medicare aged population (Table 12). The number of beneficiaries under State buy-ins for 1978 represents a slight decline from 1977—the second consecutive year there was a year-to-year decrease.

TABLE 12

Number of Aged Persons Enrolled for Supplementary Medical Insurance Under State Buy-in Agreements, and Percent of Total Enrolled for Supplementary Medical Insurance, United States, July 1, 1967–1978

Year	Aged

[1] Estimated

New Enrollments and Terminations of Aged Persons in 1979

Hospital Insurance

Over 1.8 million aged persons were newly enrolled under HI during 1979, (Table 13). New beneficiaries account for about 7 percent of the total, a figure that has remained constant since Medicare began. Nearly all additions to the rolls were persons who had just attained age 65. Also, the provisions of the law for HI coverage permit additions to the rolls at older ages. If a person files his application after he attains age 65, his HI protection can be retroactive for up to 12 months prior to the date he filed his application. HI enrollment of persons over 65 years of age resulted primarily from initial enrollment under premium HI eligibility effective July 1, 1973.

Since coverage ends in the month after death, terminations in 1979 include deaths from December 1978 through November 1979. During 1979, coverage was terminated for 1,270,000 persons who died (5 percent of the 1979 HI enrollment).[1]

As shown in Table 14, the death rate per 1,000 beneficiaries in 1979 differed slightly by race. The rate for whites was below the rate for non-whites in all age ranges except those 85 years and over.

Supplementary Medical Insurance

Additions to the SMI program in 1979 totaled 1.9 million persons, exceeding the number of those newly enrolled for HI by 66,000 persons (Table 13). Additions to the SMI rolls were higher than for HI as a result of three factors: the general enrollment period, the State buy-in program, and the enrollment of persons who are ineligible for HI coverage. New SMI beneficiaries have accounted for 8 to 9 percent of the total enrollment for each year since the beginning of the program.

Persons who fail to enroll during their initial enrollment period are given additional opportunities to do so during the annual general enrollment periods. In the general enrollment period (GEP) which ran from January 1, 1979, to April 1, 1979, nearly 179,000 persons were identified as eligible to enroll. Almost 108,000 chose to do so, with enrollment taking effect on July 1, 1979.[2]

On July 1, 1979, the monthly premium for SMI was $8.70. For persons who do not sign up during their initial enrollment period, the monthly premium is increased by 10 percent for each full 12 months in which they could have been covered had they enrolled. The increases also apply to persons re-enrolling 12 or more months after their first coverage was terminated.

Nearly 1,284,000 aged persons were terminated from SMI in 1979—97 percent of those as a result of death.[3] Only 22,000 of the 24 million aged persons enrolled for SMI withdrew from the program either by notifying the Social Security Administration or by not paying the premium. All but 3 percent of the terminations of white persons were a result of death. Ninety-four percent of the terminations of all non-whites resulted from death and the remaining 6 percent withdrew.

The Disabled

Enrollment Growth of the Disabled, 1973-1979

Table 15 shows that from 1973, when Medicare coverage was extended to the disabled, to 1979, HI enrollment grew from 1.7 to 2.9 million (an average annual increase of 9.1 percent) and SMI enrollment rose from 1.6 to 2.7 million (a 9.2 percent average annual increase). Since most disabled beneficiaries become eligible for Medicare benefits after receiving cash benefits for 24 months, changes in Medicare enrollment lag behind enrollment for cash benefits by 24 months. The sharp decrease in the rate of increase in HI enrollment during 1978 and 1979 reflected similar change in the numbers of disabled *workers* receiving cash benefits. For 1976 and 1977 (persons who could be eligible for Medicare benefits in 1978 and 1979), the average annual increase in disabled workers receiving cash benefits was 6.8 percent. For the years 1972 (persons eligible for Medicare benefits in 1974) to 1975 (persons eligible for Medicare benefits in 1977) the average annual rate of increase was 10.8 percent (Social Security Bulletin, 1977-79, Table 94).

The changes in the number of disabled workers receiving benefits reflect the combined effects of: 1) newly qualified workers, 2) workers no longer disabled. and 3) deaths. In addition, disabled persons are reclassified as eligible for Medicare by age upon attainment of their 65th birthday.

Among the disabled, the growth of SMI enrollment relative to HI is smaller than that for the aged perhaps because of the availability of other coverage (See Disabled Persons Enrolled in HI and SMI). By law, disabled persons must be eligible for HI in order to participate in the voluntary SMI program. Unlike the aged, there are no SMI-only beneficiaries in the disabled population, except in rare instances where provisions of equitable relief are applied because of errors in eligibility determinations.

HI Enrollment of the Disabled, 1979

TYPE OF BENEFICIARY

The largest group of disability beneficiaries enrolled for HI in 1979 was 2,373,000 disabled workers who accounted for 82 percent of all beneficiaries (Table 16). The remainder was 402,000 adults who became disabled as children, 112,000 disabled widows and widowers, and 23,600 beneficiaries eligible solely because of end-stage renal disease (ESRD).

The trend between 1973 and 1979 shows small increases in the percent of workers and ESRD-only beneficiaries, and a corresponding decline in the percentage of adults who became disabled as children. The percentage of widows and widowers remained relatively stable.

DEMOGRAPHIC CHARACTERISTICS

Age, Sex, and Race

Table 17 shows that the overall age distribution of disabled HI beneficiaries changed only slightly during the first 7 years of the program. Since 1973, disability beneficiaries between 55 and 64 have constituted over half of the total enrollment and have increased from 50.9 to 52.8 percent. The median age remained around 55 years. During this same period, beneficiaries under 35 years of age increased slightly from 11.1 percent of the total to 12.4 percent. The age groups 35-44 and 45-54 decreased slightly as proportions of the total.

When the age distribution is examined by type of beneficiary, it is apparent that there are significant age differences among the beneficiary groups. Table 18 shows that the overall age distribution is strongly influenced by the dominance of disabled workers among the HI beneficiaries. Examination of Table 18 shows that adults who became disabled as children, and persons eligible because of ESRD are significantly younger than the other groups. Whether the life expectancies of the younger groups would eventually alter the age distribution of these entitlement groups is not clear at this time.

TABLE 17

Number and Percentage Distribution of Disability Beneficiaries Enrolled for Hospital Insurance by Age, July 1, 1973–1979

Year	All persons	Age				
		Under 35	35–44	45–54	55–59	60–64

1974	1,928,116	220,207	237,598	481,393	405,256	583,662
1975	2,168,393	254,324	261,718	529,982	458,591[1]	663,798
1976	2,393,158	288,255	285,804	573,962	509,370	734,767
1977	2,619,373	322,625	310,607	617,285	566,917	801,939
1978	2,793,206	344,847	335,353	646,522	608,998	857,486
1979	2,910,766	361,379	356,021	658,038	642,034	893,294
		Percent				
1973	100.0	11.1	12.6	25.4	21.2	29.7
1974	100.0	11.4	12.3	25.0	21.0	30.3
1975	100.0	11.7	12.1	24.4	21.1	30.6
1976	100.0	12.0	11.9	24.0	21.3	30.7
1977	100.0	12.3	11.9	23.6	21.6	30.6
1978	100.0	12.3	12.0	23.1	21.8	30.7
1979	100.0	12.4	12.2	22.6	22.1	30.7

Between 1973 and 1979, the increase in disabled HI enrollees was greater for women (75 percent) than for men (64 percent), resulting in a higher proportion of women to the total (from 35.4 percent in 1973 to 36.9 percent in 1979). This change is reflected in the relative growth of women in each 10-year age group from 35 to 64. Only in the age group under 35 did the proportion of women decrease (Table 19).

Again, when the sex distribution is examined by type of beneficiary, significant differences from the overall distribution are found. Table 20 shows that men comprised 67 percent of disabled workers, reflecting their greater participation in the labor force, while little more than half of the persons disabled in childhood and those entitled because of ESRD were men. Among disabled widows and widowers, fewer than one percent were men.

Enrollment of non-white disabled persons increased by about 2 percentage points since 1973. Table 21 shows that the proportion of non-white enrollees was 14.6 percent in 1973 and 16.2 percent in 1979. Thus, in 1979, the proportion of non-white disabled enrollees (16.2 percent) was higher than the proportion of non-whites in the general population under 65 years (14.2 percent) (U.S. Bureau of the Census, 1980, Table 33). This was particularly true among persons eligible only because of ESRD, where non-whites constituted 27 percent of the total (Table 20).

Since 1973, the median age of white beneficiaries has increased. In 1979, the median age of white men (55.5 years) was 2.9 years greater than for non-white men (52.6 years). The difference in median age of disability beneficiaries by race shows a slight increase since 1973 attributable mainly to the increased median age of the white population (Table 22). The median age of non-white men declined, while for women it remained virtually unchanged.

GEOGRAPHIC DISTRIBUTION

The geographic distribution of disabled beneficiaries has remained stable since 1973. As shown in Table 23, in 1979 the distribution of disability beneficiaries covered by HI ranged from 17 percent in the West to 38 percent in the South. Since only 32.5 percent of the total population under 65 lives in the South, the South is overrepresented among the disabled. All the other regions are underrepresented (U.S. Bureau of the Census, 1980, Table 33). Among non-white disabled enrollees, 50 percent lived in the South, while the lowest proportion, 13 percent, lived in the West. Whites represented between 83 and 94 percent of all disability beneficiaries enrolled for HI in all geographic regions except in the South. In the geographic divisions of the South, whites accounted for between 76 and 79 percent of disabled HI beneficiaries. These distributions are similar to those for the aged.

The distribution of disability beneficiaries by metropolitan-nonmetropolitan county of residence was similar to that of the aged. General Table G shows that in 1979, two-thirds of the disabled enrolled for HI lived in metropolitan counties. By geographic division, the Middle Atlantic and Pacific States had the highest proportions living in metropolitan counties (about 84 percent) while only 45 percent lived in such counties in the East South Central States. In 1979, of those disabled living in metropolitan counties, 70 percent were located in standard metropolitan statistical areas which in 1975 had populations of 500,000 or more.

SMI Enrollment of the Disabled

DISABLED PERSONS ENROLLED IN HI AND SMI

On July 1, 1979, the number of disabled beneficiaries enrolled for SMI was 2,658,838. The proportion of disabled HI beneficiaries enrolled in SMI was 91 percent (Table 24), about the same as it was a year earlier. The comparable rate for aged beneficiaries as of July 1, 1979 was somewhat higher, 97 percent. Even at the beginning of the Medicare program, the proportion of SMI enrollment among the aged was higher—93 percent (Medicare: Health Insurance for the Aged, 1966).

The relatively high proportion of veterans among disability beneficiaries may explain the lower SMI participation rate. Veterans, especially those with severe disabilities, may have declined SMI enrollment because it requires a monthly premium, and too, they may be entitled to free medical care from the Veterans Administration. Evidence of the degree of use by disabled veterans of medical services furnished by the Veterans Administration (VA) or the armed services, is found in the Current Medicare Survey of the Disabled. This survey reported on the use of medical services in 1974 by disability insurance enrollees. Of the estimated 42.3 million covered medical services used by those disabled, 6.9 million, or over 16 percent of them, were provided by the Veterans Administration and the armed forces (Deacon, 1979). This suggests that the coverage provided by Medicare's supplementary medical insurance does not have the same utility for veterans eligible for VA benefits as it may have for non-veterans.

DEMOGRAPHIC CHARACTERISTICS

Type of Entitlement

As shown in Table 25, in 1979, disabled workers enrolled in HI had the lowest rate of participation in SMI, 91 percent. SMI enrollment among disabled women workers (93 percent) was higher than for men (90 percent). This may be related to prior status among the men which entitles them to receive medical services from the Veterans Administration or the armed services. There was a relatively low rate (92.3 percent) of SMI participation among adults who became disabled as children and who were under age 35. This may reflect coverage under parents' private health insurance.

[1] Represents persons eligible solely because of ESRD under Section 299-I of the 1972 Social Security Amendments.

Age, Race, and Sex

Despite the differential rates of enrollment in SMI shown in Table 25, the age, sex, race distributions of the SMI enrollees (Table 26) were only slightly different from the comparable distributions among the HI enrollees. The largest difference was in the percentage of women enrollees, 36.9 percent of the HI enrollees (Table 20) and 37.7 percent of the SMI enrollees (derived from Table 26). The proportion of enrollees over 55 years of age was 52.7 percent among HI enrollees compared to 53.2 percent of the SMI enrollees.

Residence

Table 27 shows that the rate of HI eligibles enrolled for SMI was lowest in New England (91.0 percent) and the Mountain States (91.6 percent) and highest in the East South Central States (94.6 percent). In every geographic division the SMI enrollment rate of women exceeded that of men. However, as shown in Table 28, the percentage distribution of SMI enrollees was only slightly different from HI enrollees (shown in Table 23).

STATE BUY-IN AGREEMENTS

On July 1, 1978, there were about 480,000 disabled persons enrolled for Supplementary Medical Insurance under State buy-in agreements. This constituted 19 percent of the total SMI enrollment (Table 29). California had the highest percent of disabled persons enrolled under the State buy-in program (43.5 percent) followed by the District of Columbia (34.4 percent).

In 1973, disabled State buy-in enrollees represented 14 percent of the disabled SMI population in the U.S. (Table 30). The percentage increased each year until 1977 when a slight decline occurred, going from 19.8 percent in 1976 to 19.6 percent. In 1978, it continued to decline to 19.1 percent. Unlike the aged, however, the actual numbers of disabled "buy-in" enrollees increased in 1977 and 1978 despite the drop in percentage.

Number of Disabled Persons Enrolled for Supplementary Medical Insurance Under State Buy-in Agreements, and Percent of Total Enrolled For Supplementary Medical Insurance, United States, July 1, 1973–1978

Year	Disabled	
	Number	Percent
1973	250,000[1]	14.4
1974	280,382	16.2
1975	363,062	18.7
1976	425,589	19.8
1977	459,227	19.6
1978	479,656	19.1

[1] Estimated

Beneficiaries With End-Stage Renal Disease

There were 23,598 persons under age 65 entitled to Medicare on July 1, 1979, solely because they had ESRD and met the insured status requirements (Table 31). For such persons, eligibility for Medicare coverage begins with the third month after the month in which a course of dialysis begins. Eligibility may begin before completing this qualifying dialysis period for ESRD beneficiaries receiving kidney transplants without starting dialysis or receiving dialysis in preparation for transplantation. Excluded from the count of those solely eligible because of ESRD were 19,532 persons with ESRD who were "dually" entitled to Medicare on July 1, 1979, because they met both the insured status requirements and were entitled to at least 24 months of disability insurance benefits. Persons eligible solely because of ESRD who are receiving dialysis are not entitled to disability insurance benefits if they are able to work. However, because of the high cost of treatment, these persons are also covered by Medicare if they meet the insured status requirements.

TYPE OF ENTITLEMENT BY AGE, SEX, AND RACE

ESRD Only

As can be derived from Table 31, in 1979 the median age of persons enrolled in HI who were entitled solely because of ESRD was 45.1. The median age of women (46.6) with ESRD was 3.5 years greater than that of men (43.1). By race, the median age of whites was 45.1 years or 0.6 years less than non-whites. For both sexes, the number of ESRD enrollees was higher in each older age group except for women in the 55-64 age group. By race, 69 percent of ESRD enrollees were classified as white, 27 percent were non-white, and for 4 percent race was unknown. There were slightly more men than women in both racial groups.

Dually Entitled

The characteristics of ESRD enrollees who were "dually" entitled to Medicare because they met both the insured status requirements and were entitled to at least 24 months of disability insurance benefits, differed from those eligible solely because of ESRD (Table 32). These dually entitled enrollees were older; 60 percent were age 45 and over (median age was 48.9) compared with 50 percent of those entitled solely because of ESRD. By sex, 64 percent of the dually entitled were men while the proportion of men among those eligible solely because of ESRD was 51 percent. About 65 percent were white.

New Enrollments and Terminations of Disabled Persons in 1979

Hospital Insurance

Almost 418,000 disabled persons were newly enrolled for HI from January 1 through December 1, 1979 (Table 33). Nearly 30 percent were 60-64 years of age. New enrollees accounted for 14 percent of the total enrollment in 1979 (compared to 7 percent for the aged), continuing a slight downward trend since 1975 when 22 percent were newly enrolled.

During 1979, nearly 349,000 disability enrollees were terminated for HI coverage (Table 34). Almost 59 percent were persons who reached age 65 and were classified as "aged" in the Medicare program. Of the remainder, 97,000 terminations were because of death, and 44,000 (13 percent) lost Medicare coverage because of recovery. Recovery means the person either no longer met the medical standards for disability or had demonstrated, despite an impairment, an ability to engage in substantial gainful activity.

Supplementary Medical Insurance

New enrollees accounted for 15 percent of the total SMI enrollment in 1979, or 410,000 persons. The percent of newly enrolled to total SMI enrollment declined from a high of 25 percent in 1975. About 333,000 disabled enrollees were terminated for SMI coverage in 1979. About 58 percent attained age 65 and were classified as "aged" in the Medicare program (Table 34). Of the remainder, 89,000 terminations were because of death, and about 39,000 recovered from their disability.

Table 35 shows aged and disabled enrollment data by Standard Federal Administrative regions for purposes of analysis and to maintain historical continuity.

[1] Includes "end-stage renal disease only."

Appendix A

Source and Limitations of Data

The HIM File

The data on age, sex, race, and place of residence of the enrolled population are from the health insurance master (HIM) record file. Changes or corrections in the characteristics of the enrollees, new enrollments, and terminations are entered into the file daily. Data for 1979 are from the HIM record file summarized on March 31, 1980.

Place of Residence

The beneficiary's place of residence is defined as his mailing address. This mailing address is not necessarily his actual place of residence. For example, some beneficiaries have their checks mailed to a bank, a post office, or to a representative payee in a State or county which may differ from the residence of the beneficiary.

Temporary or permanent changes in address are recorded as beneficiaries report them to the Social Security Administration. Only the current mailing address is kept in the HIM record file and that address is classified as the place of residence. The address that is in the file on the date of tabulation is used for all tables.

Residence Unknown

There were 24,000 aged and 5,500 disabled persons with unknown residence recorded in the HIM record file in 1979 (Tables E and I). Most of these entries for the aged were the result of processing errors with respect to codes for State or foreign countries. Most of the unknown addresses for the disabled were the result of temporary enrollment records being established for those entitled to benefits because they had end-stage renal disease. The number of beneficiaries whose residence was unknown may be calculated from Tables C and G for each region and division.

Race Unknown

On July 1, 1979, the number of aged HI beneficiaries without a race designation was over 678,000—19,000 more than the previous year. There were 51,000 disabled persons (primarily RRB beneficiaries) whose race was not known on July 1, 1979. The relatively high proportion of RRB beneficiaries without a race designation is due to data exchange procedures which do not contain a race designation. Changes in HI enrollment by type of entitlement among aged persons classified as race unknown between 1978 and 1979 are shown in Table 36.

Persons Enrolled as of the Mid-Period of 1979

Enrollment as of July 1, has been chosen as the population base for utilization rates to be published in other sections of the Medicare data series. The choice was based on the similarity of the July 1 enrollment to a 12-month average enrollment. A comparison of aged HI enrollment by age, race, and sex on July 1, 1979, with an average of 12 monthly enrollment figures in 1979 showed remarkable similarity. Less satisfactory was SMI enrollment in July, which was consistently higher than the 12-month average enrollment. This difference resulted from additions to the rolls on July 1 of persons who requested coverage during the general enrollment period. However, deriving a monthly average enrollment from a fixed date of tabulation involves a possible understatement of the number enrolled since enrollment data are less complete in the months closest to the date of tabulation. The difference between the July 1 figure and the true monthly average may be less than that observed in the present data.

TABLE 36

Number of Aged Persons with Unknown Race by Type of Entitlement, July 1, 1978 and 1979 (in thousands)

Type of Entitlement	HI Enrollment 1978	HI Enrollment 1979	Change 1978	Change 1979
Total Aged Race Unknown[1]	659	678		19
Entitled to RRB	413	445		32
Entitled to Social Security	147	143		−4
Other Enrolled Persons	99	89		−10

[1] Persons entitled to social security and railroad retirement benefits are counted as railroad retirement beneficiaries.

Appendix B

Provisions of the Law and Regulations

The Medicare program, enacted on July 30, 1965 as Title XVIII of the Social Security Act, became effective on July 1, 1966. In 1972 major changes were made in the program's provisions by Public Law 92-603 enacted October 30, 1972. Effective July 1, 1973, the name of the Medicare program was officially changed to Medicare: Health Insurance for the Aged and Disabled. (the Social Security Act, as amended through December 31, 1978).

Effective July 1, 1973, Medicare coverage was extended to disabled beneficiaries under the social security or railroad retirement programs, and to persons under age 65 who require dialysis or a kidney transplant for end-stage renal disease (ESRD).

The program makes available two separate but complementary insurance programs: (1) hospital insurance, covering nearly all persons age 65 and over, disabled beneficiaries under age 65 entitled to benefits for at least 24 months, and covered workers and their dependents with ESRD who require renal dialysis or a kidney transplant; and (2) supplementary medical insurance, covering those persons who voluntarily pay the premiums. Beginning July 1973, most persons age 65 or over otherwise ineligible for hospital insurance may enroll voluntarily and pay the premiums for hospital coverage if they are enrolled for supplementary medical insurance.

Hospital Insurance Program

The hospital insurance (HI) program pays for part of the cost of inpatient hospital care and related health care services provided by skilled nursing facilities (SNFs) (formerly termed extended care facilities), and home health agencies (HHAs) following a period of hospitalization. For the services to be covered, they must be provided by institutions and organizatioins that have been certified as qualified providers of services and the providers must have signed an agreement to participate in the program (Medicare: Health Insurance for the Aged, 1974-1979). An exception exists under special provisions for hospitals certified to provide only emergency services.

Benefits

The law provides limits on the services that may be covered under the HI program. These limits are based on the concept of a "benefit period." A benefit period begins with the first day of hospitalization and ends when the individual has not been a bed patient in a hospital or skilled nursing facility for 60 consecutive days.

The law also established cost-sharing by the individual through deductible and coinsurance payments. The Secretary of the Department of Health and Human Services is required each year to determine the deductible amount, by a formula specified by law. The formula is based on the average *per diem* rate for inpatient services furnished to beneficiaries during the preceding calendar year. The deductible amount tends to approximate the current cost of one day in a hospital. The coinsurance amount for hospital inpatient care is set at one-fourth of the deductible, for lifetime reserve days at one-half of the deductible, and for skilled nursing facility services at one-eighth of the deductible.

INPATIENT HOSPITAL BENEFITS

Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private duty nursing), drugs and biologicals, and other services ordinarily furnished by a hospital to its inpatients.

The program does not cover the services of physicians (including staff radiologists, anesthesiologists, pathologists, and psychiatrists) except for services provided by interns or residents under approved teaching programs.

The program pays for the "reasonable costs" of covered services in a participating hospital for up to 90 days in a benefit period. Full payment is made for the first 60 days of hospitalization, less a deductible applicable to each benefit period. The deductible, which is adjusted to each year, was $144 in 1978 and rose to $160 in 1979. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount equal to one-fourth of the deductible.

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional hospital days which can be used at the beneficiary's option when the 90 days covered in a benefit period are exhausted. Lifetime reserve days were subject to a copayment of $72 per day (equal to one-half of the deductible) in 1978. In 1979 it increased to $80.

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program as are charges for blood administration, storage, etc.

The program also pays for emergency services in a nonparticipating hospital. Each nonparticipating hospital providing emergency services may elect to claim payments from the Medicare program for emergency services rendered beneficiaries in a given year. If the hospital elects this option, reimbursements are made as described above. If the hospital elects not to bill the program, the beneficiary pays the bill and submits the itemized bill to HCFA. In this case, reimbursement is based on reasonable charges for covered services, and amounts to 60 percent of reasonable charges for room and board, plus 80 percent of such charges for ancillary services. Payment is subject to the deductible and coinsurance provisions of the law.

Hospital insurance benefits also include reimbursement for inpatient tuberculosis and psychiatric hospital services. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. When a person in a participating psychiatric hospital becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150-day period prior to his eligibility is deducted from his days of entitlement to inpatient psychiatric care in that benefit period, but not from the lifetime limitation.

Hospital insurance benefits have been extended to cover payments for inpatient services furnished by a foreign hospital, if it is closer to or more accessible to the beneficiary's residence than a U.S. hospital. For benefits to be payable, the beneficiary must be a U.S. resident and the foreign hospital must be accredited by, or have standards equivalent to hospitals accredited by the Joint Commission on Accreditation of Hospitals (JCAH).

SKILLED NURSING FACILITY BENEFITS

Covered extended care services furnished by a skilled nursing facility include nursing care; room and board; physical, occupational or speech therapy; drugs and biologicals; medical service of an intern or resident-in-training of a hospital having a transfer agreement with the skilled nursing facility; and other necessary health care services generally provided by such facilities.

The program pays for the reasonable costs of all covered inpatient services in participating skilled nursing facilities for up to 100 days in a benefit period. Benefits are payable only following discharge from a hospital after a stay of three consecutive days or more; generally the admission to the facility must occur within 14 days of hospital discharge.[4] However, a period of up to 28 days after discharge from a hospital is permitted when the patient's medical condition or a shortage of beds delays the admission date. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount per day ($18 in 1978, and $20 in 1979) equal to one-eighth of the inpatient hospital deductible.

For SNF care services to be covered, a physician must certify that the patient needs daily skilled nursing care or skilled rehabilitation services and must order the services. The 1972 amendments include a provision for advance approval of extended care services, whereby the Secretary[5] establishes, by medical condition, when a patient will require skilled nursing care services after hospitalization. Accordingly, a patient's physician may certify the need for a skilled nursing facility and submit a plan, in advance of admission, as to the type of services to be provided. The plan will be presumed to be the type of care covered in a skilled nursing facility.

POST-HOSPITAL HOME HEALTH BENEFITS

Covered home health services may include part-time or intermittent nursing care; physical, occupational or speech therapy; part-time or intermittent services of a home health aide; medical supplies (other than drugs and biologicals) and the use of medical appliances; and, in certain cases, services of an intern or resident-in-training of a teaching hospital. The services must be furnished by or under arrangements of an approved home health agency.

Coverage under HI provides for payment of the reasonable cost of up to 100 home health visits after the beginning of one benefit period and before the beginning of the next. There is no deductible or coinsurance. The visits must occur within a year following a beneficiary's most recent discharge from a hospital stay of at least three consecutive days or from a covered stay in a skilled nursing facility.[6] The home health services must be necessary for further treatment of a condition for which the patient received services in the hospital or skilled nursing facility. A home health plan must be established by the patient's physician within 14 days after the hospital or skilled nursing facility discharge. The 1972 amendments include a provision for advance approval of home health coverage similar to that provided for skilled nursing care services.

Supplementary Medical Insurance Program

The supplementary medical insurance (SMI) program provides coverage for a variety of medical services and supplies furnished by physicians or others in connection with physicians' services; outpatient hospital services; and home health services. Individuals voluntarily participate in the program. Premiums are paid by or on behalf of all beneficiaries, and by the Federal Government from general revenues.

Benefits

Physicians' services covered under the program include visits to the home, office, hospital, and other institutions. The program also pays for other services and supplies, such as drugs, and biologicals that cannot be self-administered, if they are furnished as a part of a physician's professional service; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests, X-rays, radium, and radioactive isotope therapy; splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment; ambulance service, and prosthetic devices that replace all or part of an internal organ. Also provided are home health visits provided by a certified home health agency in accordance with a home health plan established by the patient's physician (no prior hospitalization is necessary). Payment may be made for up to 100 home health visits in a calendar year without regard to similar services received under the HI program.[7]

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient speech and physical therapy services. In addition, effective July 1, 1973, the 1972 amendments provide for services of a physical therapist in independent practice furnished in his office or the patient's home, under a physician's plan. Reimbursement would be limited to not more than $100 of incurred expenses in a calendar year.[8]

Some services of a licensed chiropractor are covered. Covered services are limited to treatment by means of manual manipulation of the spine to correct a subluxation demonstration by X-ray.

In each calendar year through 1972, a $50 deductible had to be satisfied before payment could be made under the SMI program. In 1973, the deductible was raised to $60.[9] Bills count toward the deductible on the basis of incurred rather than paid expense; only charges allowed under the program count toward the deductible. To preclude the possibility of a beneficiary having to meet a deductible twice in a short period of time, a "carryover" provision is provided. Accordingly, covered expenses incurred in the last quarter of the year and applied to the deductible in that year are also credited toward the deductible for the following year.[10]

---

[4] The Omnibus Reconciliation Act of 1980 (P.L. 96-499) changed the period during which admission to a SNF must be effected to 30 days.

[5] In 1972, this referred to the Secretary of the Department of Health, Education, and Welfare. With the reorganization of 1980, the Medicare program was placed under the direction of the Secretary of the Department of Health and Human Services.

[6] The Omnibus Reconciliation Act of 1980 (P.L. 96-499) removed the limit on home health visits and the three-day prior hospitalization requirement effective July 1, 1981.

[7] The Omnibus Reconciliation Act of 1980 (P.L. 96-499) removed the limit on the number of visits and eliminated the application of the SMI deductible to HHA services under SMI.

[8] The Omnibus Reconciliation Act of 1980 (P.L. 96-499) increased the limit to $500 starting Jan. 1, 1982.

[9] The Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) increased the SMI deductible to $75 effective Jan. 1, 1982.

[10] The carryover provision was eliminated by P.L. 97-35 effective Jan. 1, 1982. Expenses applied toward the deductible in any one calendar year must have been incurred in that year.

After the deductible has been met, the SMI program pays for 80 percent of the allowed (reasonable) charges for covered physicians' services and most other medical services. However, deductible and coinsurance requirements do not apply to the services of radiologists and pathologists furnished to hospital inpatients. For such services "reasonable" charges are reimbursed. When an independent laboratory bills patients directly and accepts assignment, the Secretary of the Department of Health and Human Services (DHHS) is authorized to negotiate a payment rate with the laboratory for the diagnostic tests it provides Medicare beneficiaries. Reimbursement on assigned bills is made at 100 percent of the negotiated rate; the deductible and coinsurance requirements do not apply. Hospital services, incident to outpatient care, and home health services, are subject to the deductible and are reimbursed on the basis of 80 percent of reasonable costs. However, coinsurance payments for home health services were eliminated after December 1972.

The law sets special limits on the payment which may be made for outpatient treatment of mental illness; recognition of incurred expenses is limited to the lesser of $312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges may be reimbursed, the effect is to limit payment to $250 or 50 percent of the allowed charges in any year after the deductible has been met, whichever is less.

Eligibility

Hospital Insurance

Almost all persons age 65 and over are eligible for benefits under the hospital insurance program. Included are those entitled to monthly social security cash benefits or payments from the railroad retirement system. Further, a special transitional provision provides eligibility for certain persons who do not qualify for monthly cash benefits on the basis of their own covered employment or as a dependent or survivor of an insured worker. The provision applies, generally, to a person age 65 or over who (1) attained age 65 before 1968, or (2) attained age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he attained age 65. For persons who reached age 65 after 1968, the amount of work credits (quarters of coverage) needed increases by three quarters each year—six quarters are needed by those who reached 65 in 1969, nine by those who reached 65 in 1970 and so on. The transitional provision does not apply to persons attaining age 65 after 1974.

Hospital insurance protection under certain circumstances can be retroactive for as many as 12 months before the month an individual files an application for entitlement. For example, an individual may apply 11 months after attaining age 65 and still be entitled to benefits from the month age 65 was attained.

Effective July 1, 1973, disabled persons entitled for not less than 24 consecutive months to cash benefits under the social security or railroad retirement programs are eligible for benefits under the hospital insurance program.[11] Those covered include disabled workers under 65 years, disabled widows and disabled dependent widowers between the ages of 50 and 65, women age 50 or older entitled to mother's benefits who for 24 months met requirements for disability benefits but did not file a claim, and disabled beneficiaries age 18 or over who became disabled before age 22. A person must be disabled for five months before disability benefits can begin. Medicare coverage begins with the 30th month after the first full calendar month of disabilty.

Hospital insurance protection was also extended to persons under age 65 who are currently or fully insured or entitled to monthly social security benefits, and to their spouses or dependent children who have end-stage renal disease and require renal dialysis or a kidney transplant. Eligibility for coverage begins with the third month after a course in renal dialysis begins or before this qualifying dialysis period for ESRD beneficiaries receiving kidney transplants without starting or receiving dialysis in preparation for transplantation. Eligibility ends 36 months after the month in which an individual undergoes kidney transplantation.

The law now permits persons attaining age 65 who are ineligible for hospital insurance either as cash beneficiaries or under the transitional provisions to purchase hospital coverage. Coverage under this provision was effective July 1, 1973 and the monthly premium set at $33 rose to $36 starting July 1, 1974, to $40 beginning July 1, 1975, to $45 on July 1, 1976, to $54 on July 1, 1977, to $63 on July 1, 1978, and to $69 on July 1, 1979. The premium represents the estimated *per capita* cost for services furnished under the hospital insurance program. Individuals may enroll in the hospital insurance program only if they enroll in the supplementary medical insurance program. Enrollment periods for hospital protection were the same as the initial and general enrollment periods under supplementary medical insurance.

Persons who retired from Federal service after July 1, 1960, and had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959 are ineligible for hospital insurance benefits under the transitional provisons. Also ineligible are aliens with less than five years of continuous residence in the United States, and those persons convicted of crime against the security of the United States.

Supplementary Medical Insurance

Persons entitled to benefits under the hospital insurance program, retired Federal employees, aged aliens residing in the United States, and aged persons not eligible for hospital insurance under the transitional provisions may participate voluntarily in the SMI program. To enroll prior to July 1, 1973, the person had to file a written request with the Social Security Administration during specified periods. To prevent loss of entitlement or delay, the 1972 amendments provide for automatic enrollment in SMI for persons as they become entitled to hospital insurance. An individual may decline SMI enrollment. If he withdraws before his coverage starts, there is no premium liability, nor is he charged with an enrollment.

Individuals may enroll in the SMI program only during the initial and general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual is first eligible and ends three months after the month of attainment of age 65, a total period of seven months. If the person enrolls during the three months *prior* to the month in which the person is first eligible, coverage is effective with the month in which the person is first eligible; if

[11] The Social Security Amendments of 1980 (P.L. 96-265) removed the consecutive months requirement, effective 12 1 80. Months from previous periods of disability benefit entitlement may be counted in determining when the 24-month qualifying period requirement is met provided the current onset begins within certain time limits following the earlier period of entitlement.

the person enrolls *during* the month he is first eligible, coverage begins the following month; if the person enrolls in any of the three months *after* he is first eligible, coverage begins from two to three months after enrollment, depending on how long the person waited before enrolling.

Beginning with 1969, SMI general enrollment periods are from January 1 through March 31 of each year for those who did not enroll in their initial enrollment period or who previously terminated their enrollment and wish to re-enroll. A person who enrolls during a general enrollment period is covered under SMI beginning with July 1 of the year in which the person enrolls. Prior to the 1972 amendments, an eligible individual had to enroll within three years after the end of the individual's initial enrollment period or within three years after termination of prior enrollment. The three-year limitation is no longer applicable. Re-enrollment is allowed only once.

A State may enroll eligible aged and disabled individuals who receive cash payments under State supplementary income or State supplementation programs, or who are otherwise eligible for medical assistance under Title XIX if: (a) prior to January 1, 1970, the State requested that a State-Federal enrollment agreement be established, and (b) the State pays the necessary premiums.

For a person 65 years and over, enrollment terminates with the beginning of the month following the month of death. For the disabled person, coverage terminates with the end of entitlement to benefits based on disability. For a person with end-stage renal disease, coverage ends 36 months (rather than 12 months as under previous law) after the month in which an individual undergoes kidney transplantation. Otherwise, social security and railroad retirement beneficiaries may give notice of their desire to withdraw from the SMI program at any time; their coverage is terminated at the close of the following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Health Care Financing Administration (HCFA) in writing of their desire to withdraw from the program. The beneficiary is provided a 90-day grace period for the payment of overdue premiums after which coverage is automatically terminated. The 1972 amendments extend the 90-day grace period for an additional 90 days when the Secretary finds there is a good cause for failure to pay the premium before the end of the initial 90-day grace period.

Financing the Program

Hospital Insurance

The hospital insurance program is financed primarily through a tax on a portion of current earnings in employment covered under the Social Security Act. The maximum amount of annual earnings to which the tax is applied began at $6,600 for calendar year 1966; it increased to $7,800 effective with 1968 and $9,000 effective with 1972. The 1977 amendments established an automatic adjustment procedure for determining maximum annual earnings based on rising wages. The maximum earnings amount was $17,700 for 1978 and $22,900 for 1979.

The same tax rate applies to employees, employers, and self-employed persons. The rate was 0.60 percent for each year 1968-1972. The scheduled rate for 1973 was 1.00 percent, 0.9 percent for 1974-1977, 1.00 percent for 1978, 1.05 percent for 1979, and rates increase for future years up to 1.45 percent for 1986 and thereafter. The proceeds of this tax, and monies collected from the railroad retirement system (with respect to the coverage of railroad retirement beneficiaries) are placed in the Federal hospital insurance trust fund from which reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made. The hospital insurance trust fund is reimbursed from general tax revenues for the cost of providing coverage for persons who qualify for hospital insurance under the transitional provisions. Amounts paid for hospital insurance coverage by persons voluntarily paying the premiums are deposited in the hospital insurance trust fund.

Supplementary Medical Insurance

The revenues of the Federal supplementary medical insurance trust funds are derived from premiums paid by those persons enrolled for supplementary medical insurance (or on their behalf), contributions by the Federal Government from general revenues and interest on funds deposited with the Treasury. Benefits and administrative costs are paid from monies in the Federal SMI trust fund.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal civil service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Health Care Financing Administration or the Railroad Retirement Board and have a 90-day grace period in which to make payment. A person is given an additional 90 days to pay the premium when the Secretary finds there is a good cause for failure to pay the premium before the end of the initial 90-day grace period. Premiums may be paid for as long as a year in advance. For individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

AMOUNT OF PREMIUM

The Secretary of DHHS is directed by law to determine the SMI premium rate on an annual basis. The dollar amount, prior to the amendments of 1972, was required to be sufficient to produce revenue equal to one-half the expected benefit and administrative costs payable under SMI during the period in which the rate applied. Between 1966 and 1972, the premium increased from $3.00 to $5.80 a month. The 1972 amendments made changes in the method of premium determination. The rate is to be determined in December of each year and is applicable for 12 months beginning the following July. It will be increased only if Social Security cash benefits increase. The percentage increase in the premium in any given year may not exceed the percentage increase in cash benefits. Further, the rate must be determined so that the revenue produced does not exceed, but may be less than, one-half the expected SMI costs. When the premium revenue is less than half the expected SMI costs, the difference is paid by the Federal Government from general revenues. The monthly rate was $8.20 effective July 1978 and increased to $8.70 in July 1979.

Administration of the Program

Hospital Insurance

Under the HI program, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as an intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee if approved by the Secretary and acceptable to the intermediary selected. In addition, a provider may deal directly with the Health Care Financing Administration.

The Secretary may enter into an agreement with a nominated organization if it is consistent with effective and efficient administration of the hospital insurance program. Under the agreement, the intermediary determines the provider's reasonable costs for items and services covered under the program, makes payment, and assists in the application of safeguards against unnecessary use of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services; (2) serving as a center for communicating with providers; and (3) making audits of provider records. Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered under medical insurance.

Under the law, the reasonable costs of services are determined pursuant to regulations established by the Secretary of DHHS. These regulations prescribe the method(s) used to determine costs and the items to be included; they take into account both direct and indirect patient care costs (Code of Federal Regulations, Title 42, Chapter IV: Subpart D: Revised as of October 1, 1980). Requests for Medicare payment for covered services generally are submitted by the provider of services; they must be signed by the beneficiary (or someone for him, if the beneficiary is unable to do so). The provider is reimbursed on the basis of reasonable costs of covered services and bills the beneficiary for deductible and coinsurance amounts as well as for services not covered by the program.

In some instances, hospitals may bill the program on a physician's behalf for services rendered to inpatients. In these cases, payment is made by the HI intermediary. For this type of billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services.

The intermediary selected by the provider reviews claims for payment and pays the provider. Actual payment for individual claims is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payment can be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary Medical Insurance

Under the SMI program, the Secretary of DHHS may contract with carriers for the performance of specified administrative functions. The carrier's principal function is to determine whether charges are allowable (reasonable) and to make payment. Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers assist in applying safeguards against unnecessary use of services.

The allowable charge, on which the Medicare SMI payment is based, may not exceed the lowest of (1) the physician's or supplier's customary charge for the service, (2) the prevailing charge in the locality for similar services, or (3) the charge applicable for comparable services under comparable circumstances to the policyholders or subscribers of the carrier. The 1972 amendments provided that increases in the prevailing charge levels would be limited by an economic index furnished by the Health Care Financing Administration to all carriers. The economic index relates physicians' fee increases to increases in physicians' practice expenses and increases in the general earnings level.

Allowable charges are updated annually to take into account the actual charges physicians and suppliers have billed for covered services in the preceding calendar year. The revised allowable charge levels go into effect on July 1 of each year or as soon thereafter as they can be incorporated into the carrier's payment system. Thus, for the 12-month period beginning July 1, 1975, allowable charge levels were calculated from actual charge levels for calendar year 1974. However, allowable charges may not exceed the upper limit of the prevailing charges set by law at the 75th percentile of customary charges (weighted by frequency) made for similar services.

Claims for payment of SMI benefits may be submitted to the carrier either by the patient or by the physician or other supplier of services. If the patient submits a claim (an itemized bill) directly to the carrier, he receives direct payment of benefits for covered services; the patient remains responsible for the physician's (or supplier's) bill. If a physician or supplier agrees to accept the allowed or reasonable charge determined by the carrier as the total charge, the physician or supplier submits the bill and is reimbursed. The patient remains responsible for the remaining 20 percent of the allowed charges for covered services and the applicable deductible.

Services furnished by group-practice prepayment plans (GPPPs) to members are normally rendered in return for predetermined premium payments. In these cases, Medicare reimbursement is made directly to the GPPP. A GPPP which exercises the option provided by law to be paid 80 percent of the reasonable cost of services (in lieu of 80 percent of the allowed charge for such services) generally deals directly with the Health Care Financing Administration. Plans which choose to be paid on the basis of allowed charges are reimbursed by the SMI carrier.

For bills incurred in the SMI portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

Health Maintenance Organizations

The 1972 amendments enabled health maintenance organizations (HMOs) to receive reimbursement from Medicare on a capitation basis for both HI and SMI services. An HMO is an organization which provides to enrolled persons, either directly or by arrangement with others, comprehensive health services on the basis of a periodic rate without regard to the frequency or extent of services furnished to a particular beneficiary. For Medicare purposes, an HMO must provide all of the Medicare covered services generally available in its service area.

Prior to the 1972 amendments, HMO-type plans could be reimbursed under Medicare on a capitation basis only for the costs of providing physicians' and related SMI services. Plans that also provided inpatient hospital, skilled nursing facility, and home health care as covered benefits to their members billed Medicare through intermediaries and carriers on a fee-for-service basis the same as any other provider. Plans that do not choose or cannot qualify to participate under the HMO option may continue to receive Medicare reimbursement on this basis under the group practice prepayment plan (GPPP) regulations.

Plans that do not choose to participate under either HMO or GPPP regulations may continue to bill Medicare, through carriers and intermediaries, for all Medicare covered services provided to their members who are Medicare beneficiaries. The majority of the existing plans are in this category.

Appendix C

The Statistical System of the Medicare Program

The primary objective of the Medicare statistical system is to provide data to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by disabled persons and persons age 65 and over, as well as the expenditures for such services. The applications by hospitals, skilled nursing facilities, home health agencies, independent laboratories, and suppliers of portable X-ray and outpatient physical therapy services to participate in the program, provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the services used under Medicare and the demographic characteristics of individual beneficiaries.

The Basic Records

The statistical system is based on four related computer records: the health insurance master file, provider record, hospital insurance (Part A) utilization record, and the medical insurance (Part B) payment record.

The Health Insurance Master File

The health insurance master file identifies each aged and disabled person eligible for health insurance benefits and indicates whether he is entitled to hospital insurance benefits, to supplementary medical insurance benefits, or to both. The entitlement record provides the population data for each part of the program which serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

Provider Record

Every hospital, home health agency, skilled nursing facility, independent clinical laboratory, and supplier of portable X-ray or outpatient physical therapy services must apply for participation in the Medicare program. Data on the application forms are stored in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care, to the kinds and amounts of service used by persons insured under Medicare.

Utilization Record for Hospital Insurance

The administration of the hospital insurance (HI) program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he has used the benefits available to him.

When a patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Health Care Financing Administration's central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days of inpatient care to which he is entitled during his current benefit period.

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When payment is approved, the intermediary forwards the claim to the Health Care Financing Administration for inclusion in the central record.

As part of this process, information on diagnoses and surgical procedures is coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Admission and billing forms are handled in a comparable manner by home health agencies and skilled nursing facilities. The outpatient billing form is also transmitted to the Health Care Financing Administration for entry in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospitals and skilled nursing facilities that is needed to administer the "benefit period" provision is recorded centrally. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or skilled nursing facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons. It contains the information needed for tabulation from the three files related to HI utilization.

Payment Record for Medical Insurance

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills with allowed charges in excess of the SMI deductible during a calendar year.

For the enrolled population, carriers need to know from a central source the amount of the deductible that has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Health Care Financing Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

The administration and operation of the program requires accurate and complete information of the amounts paid by the carriers for physicians' services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card or other machine-readable form of each bill paid. A bill is defined as a request for payment from or on behalf of a beneficiary as a result of services provided by a single physician or supplier.

Appendix D

Definitions

Age—In completed years at last birthday on the reference month of the table for persons alive on December 31st. For persons dying during the year, in completed years on the date of death.

All Areas—Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

County—The primary divisions in most States are counties. In Louisiana, however, divisions are called parishes. Alaska is divided into 29 economic areas, shown here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, Nevada, and Virginia. In Puerto Rico, divisions are called municipios.

County Unknown—Persons whose mailing address does not permit identification of county or residence are included in figures for States but not in figures for metropolitan and nonmetropolitan counties, or for SMSA's with one exception: where there is only one type of county in a State, figures for county unknown are assigned to that type.

End-Stage Renal Disease—Persons eligible solely on the basis of end-stage renal disease (ESRD) comprise persons regardless of age who are eligible under the Social Security Amendments of 1978, Public Law 95-292, October 1978. Although the law refers to chronic renal disease, the term end-stage is generally used as it is more appropriate in describing that stage of renal impairment which cannot be favorably influenced by conservative management alone, and which requires dialysis and or kidney transplantation to maintain life or health.

Geographic Classification—Based on the address to which the beneficiary's cash benefit check is being mailed or the mailing address recorded in the HIM record file on April 1st, regardless of the reference date of the table.

Health Insurance for the Aged and Disabled—The program, commonly known as Medicare, that pays for part of the costs of hospital and medical services for participating persons age 65 and over and disability beneficiaries under age 65.

Metropolitan and Nonmetropolitan Counties—The division of counties into metropolitan and nonmetropolitan groups is based on the list of Standard Metropolitan Statistical Areas (SMSAs) as published by the Statistical Policy Division under the director of the Office of Management and Budget (see Revised Edition, 1975). Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants, based on the 1970 census. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the mailing address in the HIM record file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State Economic Area, which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an SMSA or a metropolitan State Economic Area. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA.

Other Outlying Areas—Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

Persons Ever Enrolled—All persons eligible for benefits at any time during a calendar year.

Race—White, all other races, or unknown, as entered into the Health Insurance Master record file from basic records completed by the primary beneficiary. Race unknown, whether or not specially indicated in a table, is included in the "all persons" or equivalent totals. Race is shown for an SMSA if at least 10 percent of the beneficiaries in the area covered under the hospital insurance program were beneficiaries of all other races.

Sex—As recorded in the HIM record file.

SMSA, Metropolitan SEA—See Metropolitan and Nonmetropolitan Counties. Only areas in the United States are listed.

Type of Coverage—The program provides two types of insurance: A basic hospital insurance plan and a voluntary supplementary medical insurance plan.

United States—Consists of the 50 States, the District of Columbia, and residence unknown.
